

Unveiled Secrets of this Universe & the Mission of the E-Society

Atsuko Kuroda Tokyo, Japan
. November 20, 2002

Abstract---In June 1994, unexpectedly God spoke to me (See my reference material 1, Encounter with a God.) and explained how He made this world and what we should do in order to get rid of all sadness and sorrows from human society.

This universe is created in a way that all wishes and thoughts of all living creatures will come true. In other words, what we have thought "reality" is actually the summation of all wishes and thoughts of all lives in this universe. And it is more like illusions in its nature shared by all lives in this universe. If two lives wish something opposing, the stronger desire will be realized as much as it exceeds to the other.

At this occasion, I would like to sincerely present several important pieces of truth of this universe which was unknown to human beings, the methods of creating a sadness-free society, and the mission of the e-Society.

Index Terms—Divine Mission, Energy level, Inga-jyohou, List of preference, Namadachi, Omnipotent Prayer

INTRODUCTION

"Eternal life" has been a long quested theme for numerous people in the past and present. However, as long as I can remember, I had never quested for such a theme. I just wanted to live happily. I just wanted to become reasonably rich so that I can do what I want to do without worrying about money. So, I quested and quested and quested for a long time how can I earn enough money to enjoy life. And I met a man who was a system engineer and we started a small software developing company. I was really excited by the idea that we will be able to make a big fortune at last. But that was just the beginning of the falling down to the bottomless hell.

In the totally incomprehensible, mysterious abyss, I had struggled for about two and half years to get out of that spy-war like hell and to reconstruct my life in vain. During that time, my parents who lived far away from where I lived prayed God to help me *every day*.

And, to my astonished, in June 1996, a voice spoke to me in my head and introduced Himself "GOD." It was just like an accident to me. And He said, "I have been thinking of letting human beings to create a World of Love soon. And I've been preparing for that GRAND LOVE CAMPAIGN world-widely. Do you want to join this love campaign as my spokesperson? "

I had never heard of such a thing. Religion was an faraway topic to me. I was a modern science worshiper. I thought that I must have been mesmerized by somebody. However, considering the case it happens to be true, I said "YES" to the Voice without much expectation.

When I talked about this God, my relatives asked me what kind of God is he(or she)? So, I asked God the same question. Then He answered, "I am the God who many of you call "the creator of this world." I thought that He was similar to the Christian God. He also said, "The concept of God is not exactly comprehensible for human beings who are living in the world which I(=God) made. But you can think that God exists inside of all lives."

Couple of days later, when I was resentful at people who bashed me into the hell, God said to me, "When you are surrounded by the people who are less happier than you, how can only you become much happier? They won't allow you to become happier. Besides, "you hurt and killed countless lives until today. How can YOU dare to expect to live happily? If you want to live happily, try to make everybody happy!"

"Try to make everybody happy?!" I was surprised to hear that, and said to Him, "Are you saying that to ME? How can I dare to challenge such a bold issue? I am the person who could not even manage a small company! I have never been in the position to lead others. Nobody expect me to do such a thing!" Then, God said somewhat angrily, "Okay, then, I will guide you to be able to do that!" Since then, my extraordinary life with this God has started.

Thanks to His marvelous lessons, after few years, I learned that my original desire, "to live happily," was actually a very big and difficult desire to achieve in this human society. To live really happily, we have to eradicate all sources of sadness from this world. As long as there exist lives who are suffering, their

sadness will come to bother our life to the extent they suffer. I will explain the reason later. And if we succeed to eradicate sadness, death will also disappear. According to God, death is the ultimate form of sadness, and it means *“to be deprived of everything, even one’s own body, and to be kicked out of this earth-surrounding atmosphere.”* Therefore, to seek the ways to live happily was also meant to seek for the ways to conquer death and to seek for the ways to eradicate all sadness from this universe.

It was too shocking to know. I had no word when I learned this truth from God. But, the ways to achieve it was relatively easy methodologically. All we have to do is to keep wishing happiness for all lives in this universe. Then, the best possible means to achieve the goal at each moment will be given to us one after another. We will be ushered by the unseen hands of God to achieve the goal.

One day God said to me,

“I made this world *with infinite love and passion*, wishing and imagining the happiest smiles and shining faces of all living creatures. I wanted to make all of you infinitely happy!

If you want 5000-factory-full of dresses, this world can give you that. If you want 100,000 attractive, talented, considerate, warm friends, the system of this universe can give you them. If you want to become a wizard at the piano who can play exquisitely beautiful superb tunes, you can become one. In this universe, all of your dreams and wishes are attainable, *if you can wish or at least can allow all the other lives to attain the same dreams and wishes, and if you do not hurt any other fellow lives in this universe by your wishes.*

Because, I made this world in the way that *all living creatures’ all wishes and desires will come true*. This world is like a gigantic computer system. And the system of this universe can grant all you want. It collects all the requests from all lives in it, sum them up, and make the reality *as exactly as all lives want it to be*.

What human beings have considered “reality” is the sum of all living creatures’ wishes and thoughts.

“Thoughts” or “believes” are the strongest form of wishes in this universe. If you think and talk, “he is stingy.” That means, you want him to act stingy as strong as you recognize him so. If you think, “he is ugly,” in this universe, that means, you want him to become or stay ugly as strong as you think. If you want somebody to fail in his exam, oppressing power to make him fail in his exam will be imposed on him as exactly as you want. Your thoughts and wishes about other people exert influence on their life, thus can hurt them as much as you thought and wished something negative.

If two different people wish something opposing or conflicting, the “stronger” desire will be reflected to the

reality as much as it exceeds to the other. Therefore, in this world, what more people “wish” is more likely to become reality. What many people “believe” is the most likely to become reality.

It is true that in many cases your wishes and dreams seem not to be granted. But your wishes and dreams are always processed and reflected on the reality exactly as you wished. How much of your wishes and desires become visible as the reality depends on how much power you have and how much opposing wishes and dreams exist at each moment. If more people want something against your wish, your wish will not take shape as a conceivable reality. But they are reflected on the reality as exactly as you wished.

And as long as your wishes will not hurt other lives, there is always a possibility for you to realize your wishes and desires. There is always a way for you to take to make your *love* intention and *love* wishes to come true. All you have to do is just to keep wishing the desire. Necessary means will be provided to you by the system of this universe. Love is almighty in this universe.”

Eight years ago, under God’s guidance, I had chanted, “I would like to make the largest possible contribution for the happiness of all lives in this universe!” and “I want to become a lecturer of the Laws of Love on behalf of God!” in my mind together with other several wishes, numerous times, all day long, every day. Because this world is made to realize wishes of lives, I chanted that with all my power. The stronger the wishes, the more chances arise for it to come true. And about one and half years later, God said, “Now your wish has already fixed to come true. So, you do not need to chant it any more. The means to realize that dream will be given to you one after another until the day you can realize the dream.”

I thought that I could realize the dream much faster. But it took me to come here for more than eight years. Recently, I feel pretty strongly that the dream I chanted seven years ago is really coming true. And I feel very grateful to SSRR Conference Management stuff for giving me a wonderful opportunity to disclose what I learned from God.

God taught me several reasons why He picked me up to be His spokesperson. One of the biggest reasons was because I was a modern science worshiper. This is what I learned quite recently.

It may sound odd, but it is true. It was a quite important prerequisite for His spokesperson. God wanted and wants to let human beings to make a World of Love. For that purpose, He needed someone who can convey His messages even to science worshipers in the world and explain how this world is made and thus *what religious people have said for thousands years are equally valid just like what modern scientists have proved to be the truth of this universe*.

To speak to the science worshipers in the world, the person has to be someone who loved and adored science and scientific way of thinking. The more people love a certain field, the stronger and the more competitive people become in that field. Unless the spokesperson loved and cherished scientific world, dominant people in the current world would not listen to the person. According to God, it is a natural law.

American people allow President Bush to speak before Americans. However, Iraq people would not allow President Bush to speak before them. President Bush have loved and took good care of American people for a long time, that is why he was allowed to become a president of the United States and is allowed to speak before Americans.

If God train a person to become His spokesperson, that person can definitely speak before religious people. However, to speak to all the people in the world, one has to be able to speak before science worshipers as well. The spokesperson must be able to speak before science worshipers in order to call for their cooperation and participation to the Creation of the World of Love. The World of Love means the world where all lives in this universe can live infinitely happy without suffering from any kinds of sadness and sorrows as God intended so. Without full-support of the non-religious people, it is impossible to realize the Creation of the World of Love.

Until today, religious world and modern scientific world have evolved as if they were two separate worlds and without realizing, members of the two worlds have been hurting each other by wishing and saying conflicting things or neglecting each other. The truth is, both were equally valid as a choice, but at the same time both were equally insufficient, because the love of both parties failed to cover the other side.

In this universe, which God designed to realize all wishes and thoughts of all lives, possibility of our world is virtually infinite. We can make any kind of world. However, according to God, it is always true that the best ideas and solutions are given to us when we take account of all lives' happiness in this universe as a premise and wish something. When science worshipers neglect religious people's wishes and happiness, we cannot get the best ideas and best solutions in this universe.

This is actually what I myself learned through painful experiences. Since Japanese post-war education system has prohibited religious education on a elementary and high school level, most of the post-war generation Japanese have grown up in the science-only atmosphere. Familiarity with religious concepts seems to be slightly different for Westerners and some Asian people. However, judging from the fact that science has not yet acquired convincing explanations about miracles and supernatural phenomena, I think, we can say that even the religious researchers and developers in the field of modern technology and science have not yet given enough

considerations to gain the idea which can explains those mysteries.

In the same token, for human beings to develop further and eradicate all sadness from the earth-surrounding atmosphere, people's love and consideration have to cover at least "entire human beings" on earth. That is the criteria God set for each species in this universal system in order to grant them the idea which can free themselves from all kinds of sadness and sorrows. As long as people think that they can take advantage of other countries for their own country's interest, those people can never get the most precious idea which can make themselves really happy.

Since recent years most of the people in the world have come to think that all the people in the world should be able to live peacefully and happily, at last here come the time that God can teach us how to make it real and He taught me how for these eight years.

Today, I would like to talk about several important pieces of truth of this universe briefly, how to create a sadness free society, and the mission of the E-society. And on behalf of the God who guided me for these eight years to come up to this honorable moment, I would also like to take this opportunity to propose "the Creation of the World of Love" to the people gathered at the SSRR conference, to the people in the world, and exactly speaking, to all lives in this universe. And I would like to express my gratitude again to SSRR Conference Management stuff for giving me this wonderful opportunity to convey the messages from God.

SEVRAL IMPORTANT PIECES OF TRUTH OF THIS UNIVERSE

I. Universe is the ultimate form of the System of Love

As I mentioned earlier, this universe is like a gigantic computer system which can process immeasurable amount of data in an immeasurably short amount of time. God calls it *the ultimate form of the System of Love*. It has profound implications. I have learned only a portion of His deep love intentions implemented in the system. Still, I was deeply impressed many times when I realized God's deep love hidden behind the design, mechanisms, functions, principles, concepts, natural laws implemented in the system of this universe. Let me introduce some examples of the reasons why God calls it the ultimate forms of the system of Love.

(1) *When we wish something, the system of this universe gives us the best possible means at each moment to realize our wishes one after another until we realize it.* However, on earth we are living under enormous disturbing forth of ill-wishes emitted from other lives and other human beings. Therefore, sometimes these mechanisms may not be perceived. However, this is always functioning correctly, fully taking account of such hash environment distinctive to earth-surrounding-atmosphere. Further, in case of bigger wishes, on earth it sometimes takes us

years to realize them, but until we realize them, what we wished are kept in an on-going status unless we give them up. And when there come the good chance to move, the system ushers us to do what we should do to realize the wish which was in a pending status. We usually call these things as “God’s unseen hands lead us.”

(2) In this universe, basically we gain something nice after pouring love to lives and things, as rewards for pouring love on them. “Basically” here means that on earth a lot of ill-wishes exist and sometimes those ill-wishes hinder us to gain the rewards, and those ill-wishes sometimes give us something undesirable as well to realize those ill-wishes. However, those things do not break the rule or the mechanism of gaining something nice. Also, when we are born, we usually gain love from our parents and surrounding people without pouring love first. This is because babies inherit their parents’ love savings when they were born and they gain benefit from those accounts.

(3) *All wishes are granted through the encounters with “lives” and “things” by pouring love to what we encountered.* I would like to talk about this some other time.

(4) When the system produce reality for each life, *always the best possible reality is chosen for each life* after thoroughly examining each life’s history data, i.e. a detailed personal history of what one did, thought, felt, imagined, wanted, loved, wished, and all the other what one sensed. So, what ever happens to us, it means that it was the best possible choice. God wants us to know *how thoroughly the system examines our past records and our circumstances* and decides what will happen. What God want to say here is that if something sad happened to us, it is our fault.

Eight years ago, God advised me to articulate in my mind, “I do not to want to make a mistake!” many times a day for about a year. This is very important. If we do not make any mistakes, something sad never happens to us. And we never die.

(5) The system of this universe compares and collates all lives’ wishes in the backgrounds of the system or behind the reality. And people, who can cooperate for their own sake, take cooperative actions as if they know what other people have thought and wished prior to that moment. Therefore, blessed encounter with other people are quite precious for both sides.

(6) When people love each other something good happens & when people hate each other, something sad happens.

(7) Love creates something nice & hatred creates something sad.

(8) We will become what we loved most.

(9) Laws of Love govern the system.

(10) Love is the forth which *attracts* or *pull closer* other lives and things. And hatred is the forth which *push away* other lives and things. Because we love, people and things come nearer.

And because we hate, people and things go away. On earth because of other people’s negative wishes, sometime what we abhor come closer to us, or what we love go away. Since reality is what we make together, there are infinite kinds of possibilities to happen. However, love is always the power to pull objects closer, and hatred is the power to push objects farther.

(11) In the World of Love, like heaven, all lives live in the movable houses or mobile houses. Lives are constantly emitting wishes and thoughts and feelings, and in this universe our wishes are come true through encounters with other lives and things. Therefore, it is quite natural that lives are keep moving in accordance with their desires.

Lifestyle of living in the fixed houses is distinctive to the low energy level society like earth-surrounding atmosphere. In such a society, people are usually forced to being in an unhappy status staying closer with the people they do not particularly like. Those phenomena are produced typically by the ill-wishes of other lives or ill-wishes of both parties. For example, Palestinians and Israelis stay close to hurt each other and to become unhappy. People who hate each other never meet in the World of Love. Arab people and Americans never meet in the World of Love. If we human beings decide to create a World of Love in the sky, those people who have a long tragic history will not meet in the sky until the day when their broken heart and mind are completely cured and began to love each other.

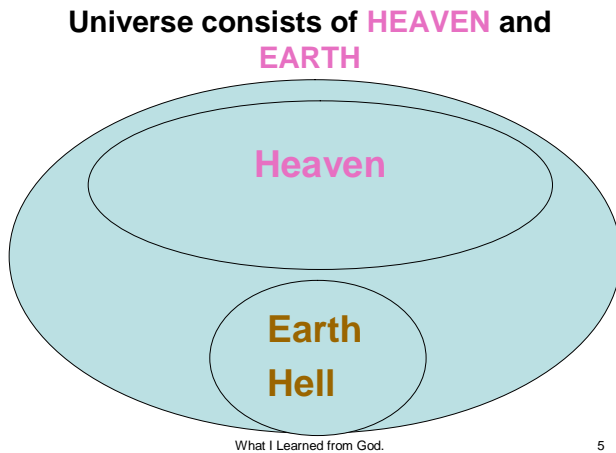

(12) When we produce something, the more we pour love into its productin, the superior products we can make. In another word, if we wish to make greater contributions for more people, we will be able to develop better products. And if we follow God and *wish to make maximum possible contribution for all lives in this universe, we will be able to achieve outstanding results far beyond our imagination can reach.* God calls this level of contribution as one’s Divine Mission. When we pursue our own Divine Mission, we can achieve incomparable, outstanding results. Let’s try that!

Now I would like to pick up some other important features of the system of this universe and explain them.

II. The universe consists of heaven and earth.

The world that God made was actually heaven and earth. (See Figure 1) To know the whole member of this world is very important. When we recognize the existence of lives in heaven, our life on earth began to change in a dramatic way. This is now beginning to take place world-widely.

Figure 1

God calls our earth-surrounding-atmosphere “Hell,” because on earth killing and hurting of lives have never ceased. And earth has always been filled with screams, hatreds, and cursing of lives.

In the scale of love energy, earth’s energy level is minus. To my surprised, in the eyes of God and lives in heaven, *we are evils living in the hell*. Isn’t it shocking to know?

In heaven, on the other hand, no life hurts or kills any other lives, and all lives just emit love wishes to all the other. No sad thing happens at all in heaven and all lives live eternally. God calls heaven the World of Love, too. Heaven’s energy level of love is positive and very high. It means that lives in heaven are loving each other very much.

Until today, only a portion of people succeeded to feel or to know the existence of heaven. However, heaven is definitely exists and there exists almost infinite number of lives including passed-away human beings. Number of lives in heaven is incomparably larger than the one on earth.

III. In this universe, when we take into account all lives’ happiness and then wish something, we can get the best possible ideas, solutions, and answers.

When we are considering all lives’ happiness in this universe, we can get the best possible answers.

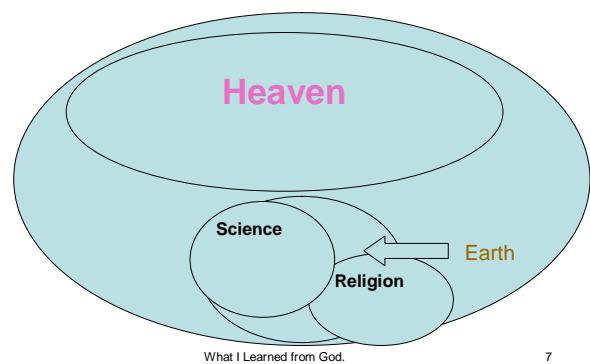

Figure 2.

In this universe, the more lives our love encompasses, the better ideas and better life are given to us. Eight years ago, God said to me, “If your love does not go beyond your family members, you won’t be allowed to have better life.” It means that if we cannot love other people who are not our family members, we will not be able to live reasonably good life.

And As I mentioned before, it is also true that in this world *we are given the best ideas and solutions, when we take into account the happiness of all lives and wish something*. When I learned about this, I was really impressed. This must be one of the most precious and useful information for everybody. And it must be invaluable for researchers, developers, and engineers who are seeking for veritas, i.e. truth, of this universe, trying to invent and develop something new, and trying to explore new horizons.

When we recognize the whole members of this universe correctly and when we wish happiness for all lives, what we see and what we think began to change. In another word, what we receive from the system of this universe changes and our world will change accordingly.

IV. We are more like “allowed to stay and live on earth by other lives.”

Today, most of the people are aware that no nation can prosper without keeping good relations with other countries. And many individuals are aware that their successes owe much to other people. According to God, the same thing is true for all social strata in this universe, from individual’s level to the earth and heaven’s level.

Living in the world where all wishes of all lives come true means in one sense, an individual’s existence and happiness depends largely on one’s surroundings, i.e. things and lives such as family members, friends, acquaintances, neighbors, colleagues, clients, etc., etc., who we associate with.

And our surroundings mean, exactly speaking, the entire members of this universe and things. (See Figure 2)

Yet it is also true that our life is largely determined by the people who we keep close contact. How they see us and what they want us. How much influence does each outer life impose on us depends on our relationship with those lives. *We are more influenced by the lives which we keep closer contact and the lives that have stronger “says” to our life.*

Our life is largely determined by the wishes of ourselves and others who we keep contact.

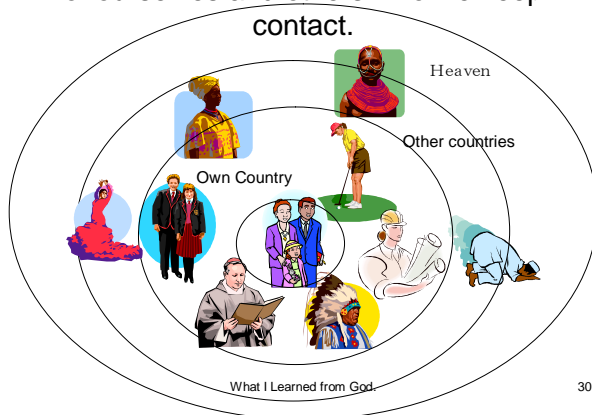

figure 3

Therefore, when our life changes, in many cases people who we associate with also changes.

Now I would like to explain some new concepts which are necessary to understand the structure of this universe and how things work.

V. Important Concepts

(1) INGA-JYOUHOU (因果情報) = Personal History Data

Inga-jyohou is a Japanese word which literally means the information on cause and effect. It is like a very detailed personal history.

According to God, all we did, said, saw, thought, felt, dreamt, imagined, virtually all we sensed or perceived since our birth up to present are recorded exactly as we did or perceived. These records are called Inga-jyohou and inherited from parents to children, to grand-children, on and on.

These personal history data are referenced as the following two very important kinds of information sources from the system of this universe.

(2) List of Preferences (好みのリスト)

Each life's history data can tell how much one likes something or someone and how much one dislikes something and someone. So, it is easier to think that there is a list of preferences for each life. And those data are referenced when the system of this universe determines what will happen to that person. (See Figure 5.)

(3) Love Saving Account (愛の貯金通帳)

Inga-jyohou is also referenced to check how much love each life poured on what. Therefore, it is easier to think that each person has an saving account for each object we have ever sensed and perceived. This account keeps the record of how one liked the object or how one disliked the object in terms of love. At the moment we perceived new object, our new love saving account is made for that object. And what we did, thought, felt, etc. are exactly recorded in that account book.

For example, if we admire a person, how we admired is exactly recorded in our saving account for that person. And every time when we think of that person, what we thought about him are added into that account book. If we abhor or look down the object, that negative feelings are exactly recorded.

And when the system of this universe determines what will happen or not happen to us, those love savings data are referenced. When we encounter with a person with whom we have very positive saving records, something very desirable will happen in accordance with our wishes. In contrast, when we meet a person with whom we have substantially negative records, something terrible happen. Suppose a terrorist thrown into Pentagon, what will happen? Suppose a policeman who despised criminals for a long time thrown into the hideout of criminals, what would happen to him? Something terrible would happen, don't you think?

In this universe, nothing happens haphazardly. All happenings have causes. And something good happens when we meet a kind of people we admired a lot. And something terrible happens when we meet a kind of people we despised or hated a lot. These love savings functions like money. If we have a good records about the object, we can gain grater benefit from the object in accordance with our wishes and preferences.

Further more, unlike money, we can get anything we want with this love savings, including beauty, abilities, whatever we want. In general when we have a lot of positive saving accounts, our chances of realizing our dreams increase and thus our life becomes better.

In this universe, God says, as long as we have positive records in the saving account of a person, the person cannot hurt us, no matter how hard the person hates us. That is why Bible teaches us to “love your enemy.”

(4) Power

God says that power is almost same as *the accumulation of love* we poured outside of our body. What we get from outer

world when we are babies is mostly determined by our parents' savings of love and inga-jyohou. However, as we get older, our power has become more and more closer to the love we poured outside of our bodies and it becomes more and more decisive elements for our life.

Being powerful means almost same as having more savings in terms of love. The more savings we have, the more of our wishes are granted and our life become richer in our own preferred way. Thus, in general, powerful people outstand in their preferred way.

Our power is also very similar to how many people give us love, respect, support or something positive to us. How many fans, supporters, good friends, and good family members we have. If we have thousands of fans who send us love, we can become a star, business tycoons, or big shots in our fields. If we can gain love from all lives in this universe, we become Human Gods.

What we have to keep in our mind is that *power is, in its nature, the sacred entrust and authorization given to us from other lives in this universe in order to enrich this world in each life's favorite ways. We are expected to use our power to enrich the life of those who gave us power in our favorite way.* When we forget this, and do something harmful to those who bestowed power to us, we will be deprived of the power once we had.

(5) Omnipotent Prayer

As soon as I accepted God's offer to become His spokesperson, He advised me to pray "infinite happiness for all lives in this universe." I prayed it every day, countless times. After few years, I was finally taught the reason why God directed me to do that. *It is the easiest and quite efficient way of increasing my love savings for all lives.* Every time I pray happiness for all lives, amount of my love savings for all lives increases.

In this universe *the love we poured outside will surely come back someday through various routes and in various forms in accordance with our wishes and preferences.* It is one of the laws of Love mounted in the system of this universe. It does not always come back from the lives who we poured love, however, it returns from somewhere according to our Inga-jyohou. There are usually time lags to come back, yet the amount of love we poured always becomes equal to the amount of love we gain eventually.

According to God, if we keep praying happiness for all lives in this universe, someday our love savings become enough to gain something good even from our enemies, no matter how the enemies hate us. To my grateful, I myself have past that point. If we keep praying more, next, the time will come when no one can hurt us any more, because we can gain something good from all lives at least for the amount of love we gave to them. And if we continue to pray happiness for all lives further, there come the time when no matter where we go, we will be welcomed and eventually wherever we go, something

marvelous will happen to us, *regardless of social situations at that times.* Therefore, we call this prayer Omnipotent Prayer.

So, I still keep praying infinite happiness for all lives every day, looking forward to seeing something marvelous happen to me. God says that human beings have not yet known how marvelous life we will be given when love begin to return from every corner of this universe. Therefore, I strongly recommend all of you to start chanting this Omnipotent Prayer in your mind every day.

Now I would like to introduce another surprising and intriguing way of looking at this universe, which I learned from God. It is totally a new concept for the contemporary human beings. But it enables us to understand this universe a lot deeper.

VI. A "life" is a concentrated energy mass; it is like an energy spring which emits infinite kinds of energy

According to God, we, or lives, are actually constantly *changing* energy masses or energy concentrations. And we are also like *energy springs* which constantly emit infinite kinds of energy in the forms of love, hatred, all sorts of feelings, actions, words, etc.. So altogether, we are constantly changing energy masses *constantly exerting influence* on outer world, not only in the form of actions, but also in the forms of thinking and wishing, feeling, etc..

And those energies emitted from all lives are filling and floating in the air and creating our reality. So, to my surprised, air differs from one place to another. And air is actually exerting a great influence on our life as an element of our surroundings.

When we think of someone who is far away, if there is no hindrance, our thoughts and feelings reaches to that person. *And as far as our imagination goes, our energy spreads, and our world expands.* The size of our cosmic world for the people on earth is the size of the imagination of some people who have strong interest in outer space. Outer space or cosmic world is the world which mainly people on earth are creating. Heaven exists in a different dimension from our outer space or cosmic world.

Figure 4

Earlier I explained about Inga-jyouhou (personal history data) kept by the system of this universe. Then, where is it? Maybe someone can guess. Yes, those data are kept in our body in a form of energy.

Now please look at Figure 4. People look quite different from person to person. We act differently. We think differently. We feel differently. Is this all produced by the difference of Inga-jyouhou? No, as I mentioned earlier, other people's wishes and thoughts about us also influence our life greatly.

What other people think and wish about us springs out from their body, flies through the air, and reaches to us in the form of energy particles, and exert influence on us. Their hatred hurts us. Their love makes us happier.

This is the reason why "kikoo practitioners" can kick in the air and can knock down people standing far away. A kikoo practitioner's strong "wish" to knock down the person springs out from him, flies through the air, reaches to the person, and knocks him down.

On earth other people's thinking, feeling, and wishing toward us are quite often very different from what we ourselves want. Those energy particles emitted by other people about us can distort our life very badly. They can bind our actions. They can disturb our thinking. And thus, they can produce what God calls *straitjacket phenomena*.

Further, those other people's influences are imposed on us not only in the forms of thinking, wishing, or feelings, but also they are coming into our body as what we eat and drink. Everything in this universe is energy. Food is also energy mass. So, energy of food goes into our body, and gets mixed with our body.

If we change what we eat, what will change? What kind of function is food playing? Those questions have been big issues of learning in God's lessons. When we change people to

keep close contact, what we eat and drink changes. Opposite is also true. Many times God advised me to change what I eat in order to control who to meet and to protect myself from other people's ill-wishes.

And what I thought really intriguing was the differences seen in our photos. We all know that quite often our pictures look very different from photo to photo. But we did not know why? God taught me that. The differences of our look in the pictures are exactly reflecting the differences of our energy status. What kind of energy we were receiving from other people when the picture was taken? Does the person who took pictures love us? When we were taken pictures, were there any other people who love us? Were there things we loved around us? Was the camera manufactured by the people we loved? Does the person who developed our pictures like us? Even, what we are thinking while we are taken pictures affects the results. And among many wonderful information that I learned from God, the following truth is one of my favorite.

- (1) Our should-be-appearance is what we like most.

In our body, there are ample data to find out our most favorite appearances as Inga-jyouhou. The system of this universe knows what kind of appearance each live love most and it can produce our body accordingly. Those appearances are called our *should-be-appearances*. We also call that a *healthy body* (*Kenzen na karada* in Japanese) in a true sense.

It is possible for all lives to become own should-be-appearances. It is true that on earth people's appearances are usually distorted badly by other lives' thoughts and wishes, or by our own mistakes. However, *if we keep wishing Omnipotent Prayer for years, the time will surely come when our body becomes exactly what we love most, i.e. our should-be-appearance*. That is usually the time when no body hurt us in any form, such as by actions, by words, by wishes, by thoughts, by feelings, etc.

Other lives negative influence distorts us in various ways. It can hurt our appearances. It can bind our action and performances as I said earlier. On the other hand, other people's healthy positive influence gives us power to become our own favorite entity, appearance-wise, ability-wise, performance-wise, and virtually in all ways. Love has magical power.

- (2) In this universe all disabilities, all injuries, all diseases, and any kinds of damages we got are curable no matter how serious they are.

As I mentioned earlier, we are constantly *changing* energy masses. Our appearances actually have been changing drastically. When we were born, we looked like babies. When we are in our twenties, we looked like young adults. When we become hundred years old, we expect to look completely different from us in our twenties. However, we did not know what makes us change so much correctly. Our beliefs, common

sense, expectations, wishes and our relationships with other people who we associate with was and is the true causes for these drastic changes of our bodies. But we did not know that. And we have thought that we can not change our body drastically unless we undergo cosmetic surgery. However, that was totally wrong.

The truth is, in this universe, all lives always have possibility to acquire own should-be-appearances. All disabilities, all injuries, all diseases we got are curable no matter how serious they are. And to cure all those damages, *all we need is LOVE*.

For these eight years, I have been preparing to do lectures entitled "Laws of Love." God has been giving me all necessary lessons to perform the lectures. And to help all lives on earth to acquire own should-be-appearance and should-be-ability, in other words, to help all lives on earth to become own should-be-entity is one of the key issues which I am targeting to achieve through my lectures.

Now, I would like to move on to discuss a bit more about energy, i.e. energy levels.

(3) Energy Level in terms of Love

Energy level is one of the key elements which determines our life. Please look at Figure 5. The system of this universe determines what will happen to our life based on our energy level and List of Preference.

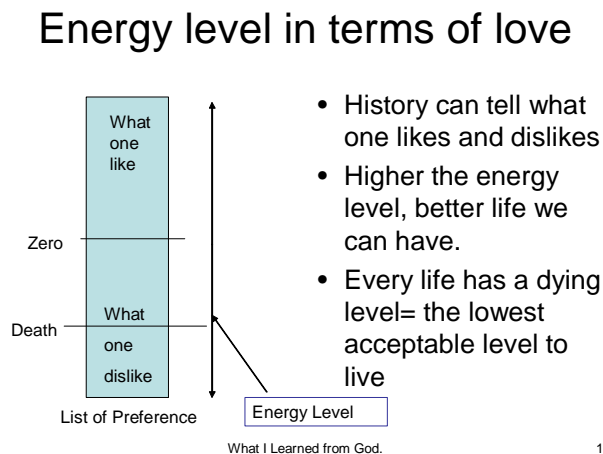

Figure 5

As figure 5 shows us, when our energy level goes up, something we like happens. And when our energy level goes down, something we dislike happens. This is the reason why something sad tends not to happen during our heydays. In contrast, when we are in a declining stage of our life, many sad things tends to happen to us. So, important thing for us is how to keep our energy level higher.

In this universe, if our energy level is high, it means that there are many people who love us or there are more lives who give us favorable influences by their actions and by their thoughts. And if our energy level is low, it means that few people love us, or few people give us favorable influences, or some body hates us, or somebody wishes something nasty about us. So, to develop good relationships with other people is the key to keep our energy level high. However, we all have to aware that as we get older negative wishes or hatred emitted from other lives increase substantially. And their hatred usually hinder us to increase good friends and acquaintances.

Another important point for us to keep our energy level high all the time is our attitudes toward younger people. Human beings have made a big mistake for a long time. We looked down younger people as if they were inferior. When we look down others, our love savings for them is recorded as minus. When we look down people, unseen forces which make them act like inferior persons are imposed on them and hurt them badly. This is called the power of expectation. Therefore, it is rational to be recorded as minus figures. Because of these common mistakes among us, as we get older, our love savings in our society at large constantly decrease. It means that the benefit we can get from our society decreases as we get older. This was the biggest cause of aging and death for human beings until today.

To overcome our aging problems and death, we have to change our relationships with younger people. We have to "think" or "recognize" that they are not inferior in any sense at all. Instead, we should "think" that they are equally talented and matured in all senses as we are. God said to me many times that we were all equally gifted infinite potential abilities regardless of our age. If many of us are kind enough to allow babies to act like God and wish it strongly, even a baby can act like God as soon as they are born to this world. According to God, this is also the truth of this universe.

Sometimes it may be difficult to think and treat younger people with respect. Again, the easiest and the most efficient solution is to keep praying happiness for all lives. As we pray this, our energy level goes up higher and higher infinitely, and we will be ushered by the unseen hands of God to solve all problems in the best possible ways at each moment. And someday all problems will be solved.

(4) Prosperity and decline in our life

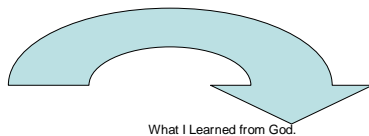

Figure 6 shows typical human life. In our heyday, our energy level goes up. It means, as I mentioned earlier, during those days, we are most popular. We are loved and favored most by other people. When people get married and have children, typically their energy level goes up, supported by family members' love. To my surprised, in this universe children are given to lives to *help parents emit love outside* in order to make their life better. The important point was and is to *emit love outside* in order to become happy and to have better life. We usually did not love others as much as we love our family members. Therefore, we needed children to emit ample love outside and make us deserve to gain ample love from

somewhere, and make our life richer. It also meant the ways to create comfortable love atmosphere around us. If we can love other people as if they were our own family members, we do not need to bear children.

In heaven, according to God, no life bears children. It is a distinctive phenomenon seen in a low energy level world like earth-surrounding-atmosphere. In the world where exists enough love and care for all lives like heaven, there exists no sadness. If we love and cherish all the other lives and treat them nicely, death disappears.

Prosperity & decline in our life

- When people receive love from others, people prosper, and when people receive negative feelings, people decline. This is true not only for human beings, but all other things from organization to things.

19

Figure 7

(5) Energy level of the society & common sense about love.

According to God, our energy level is the same thing as how much love intentionally and unintentionally we expose when we think about others. For example, in some countries even eight years old children are expected to work hard. And, in other countries, to let children work hard is regarded as cruel thing to do. Each country has its own love standards and expectations in dealing with others. Each community has its own love standards and expectations. Those commonly shared love standards and expectations in dealing with others among community members are telling their energy level of Love.

Two thousands years ago, people thought that it is OK to let slaves to fight each other until either side die for the sake of their fun. Today, luckily, we do not think that way. We have succeeded to raise our love standards in our community substantially. In this universe, those love standards decide what kind of life we deserve to have. With higher level of love we think and treat others, higher level of living we deserve, and we can make better world.

Article 25 of the Japanese constitution says that all people shall have the right to maintain the minimum standards wholesome and cultured living. Japanese constitution was enforced in 1946, almost 60 years ago. To guarantee those minimum living standards for all Japanese might be a surprising advancement for the Japanese people 60 years ago. However, after 60 years, what should we expect for us to be guaranteed?

The same minimum living standards? Did not we achieve remarkable advancement in many ways? Did not our society advance and prospered in many ways? And still, do we have almost similar love standards and expectations in dealing with others?

We are living in the third millennium. I believe, we should guarantee all the people in the world much higher standards of living in many ways. I believe that now is the era when all the people in the world should be guaranteed higher living standards in all ways. And I believe that we have the power and ability to realize those targets.

Poverty, hunger, disease, accidents, disasters, fighting, wars, losing jobs, losing love, etc., etc., etc.. Still, there are numerous forms of sadness in our society. However, luckily, I could learn how to eradicate those sadness and sorrows from our society. Why don't we start getting rid of those unnecessary things from our society, and enjoy infinite kinds of excitements hidden in this universal system to our heart content.

In this universe, which God made pouring infinite love, to live happily and to make better world, all we need is LOVE. If we emit love, our life becomes better, and the world becomes better. If we emit love, and love only, in concert, we can create a kaleidoscopic fantastic and fascinating world.

In addition, if we, the people on earth, pursue this highest goal, someday earth merges with heaven. We will reach to heaven *without dying*. Earth-surrounding-atmosphere and heaven join together and become one world. It happens when our social love standards equal to the one in heaven. Lives in heaven think like God. We still have a long way to go at present. However, all of us are energy springs which can emit infinite amount of love. So, if many of us wish to do that strongly, it won't take long. It's worth trying. It will be exiting. It will be really fun. God and all lives in heaven are giving full support for this undertakings.

Now, friends in the world, why don't we start changing our evil-like life style together and move our giant step forward to heaven.

HOW TO CREATE A SADNESS-FREE SOCIETY

- (1) Let's eliminate the causes for sad things to happen, i.e. stop killing and hurting lives.

As I mentioned earlier, the original causes of sad things to happen is largely the sadness of other lives. Therefore, we have to create a society in which *we can live happily without killing and hurting other lives*. Such a life style is called *Namadachi lifestyle*. Namadachi is a Japanese word and it means generally to stop eating fish and meat and to avoid killing lives. Here I

mean to stop killing and hurting any lives for the sake of one's happiness, conveniences, or enjoyments.

To create Namadachi society, we have to develop Namadachi food, the food which does not use lives as its materials. We call it the *food of love* in real meaning. Considering the outstanding synthesizing technologies we have today, I believe, it is not so difficult for the contemporary researchers, developers, and engineers.

We also need space castles, space towns, space cars. Because, when we think of eradicating all sadness from earth, according to God, the nearest path for us to take is to move up into the sky. Human beings on earth will cross the national borders in the sky, and create one world peacefully. Therefore, this project is suitable for us to pursue as a global project, calling for cooperation and participation of all the people in the world. God said to me several years ago that we were already moving this road without fully realizing the meanings of developing space stations. So, what we need now is to have clear vision of our near future, wish strongly to achieve it, and to stimulate and accelerate our efforts to the exiting level.

Moving up into the sky is also the oracle for the people who are now engaging in fighting. For those who have long history of fighting, infinite open space in the sky is the best solution. Until the day people cure their damaged heart and soul completely, and start emitting love even to the old-day enemies, they should be allowed to keep distance from their enemies. In the sky, only the people who love each other meet; enemies never meet in the sky. Unless we LOVE other people, there will be no encounters in the sky. And all of us will realize how important LOVE is! Now, friends in the world, let's look up the sky! Let's stop fighting! And let's start exciting, thrilling adventure!

We also need Namadachi clothes, Namadachi papers, and all other Namadachi goods to live comfortably.

(2) Let's guarantee all people's rich life

God classifies industries as "Industry of Love" and "Industry of sadness." And to eradicate sadness from our society means that the industries of sadness, such as medical industries, restaurant business, fishing business, etc., will disappear some day.

Unless high level living standard is guaranteed, people who are now working in those industries will not support the project willingly. Nobody wants to lose one's job. The more people oppose the project, the less we can achieve. Therefore, to eliminate sadness from our society, it is indispensable and also it is the best to guarantee high level living standard for all the people in the world. And I think, it will be the best task for global organization. Elimination of sadness is not achieved on a country level, anyway.

Since the Creation of the World of Love is supported by God and all lives in heaven, and we call for the support and participation of all people in the world, people who will work for this project will gain enormous power. And I think those people will be able to achieve outstanding results.

(3) Let's develop global education system to help people keep up with the rapid social changes and to let all the people participate positively in the creation of the new world in one's most favorite way.

An ideal education system, thus the most efficient education system is, according to God, the lessons given by the top-notch specialists in each field. This is one of the most precious information I learned from God. And "*acquiring ability*" means to receive abilities from teachers in exchange for love and respect. If instructors are top level specialists in the fields students respect teachers without realizing. And that respect allows students to acquire abilities most efficiently. Usually young talented aspiring musicians, say, pianists or violinists, take lessons from the top-level musicians. "*Love*" and "*Respect*" is the key to acquire abilities in this universe. But it was a hidden secret until today, folks!

When I took some courses recently, God taught me to pray infinite happiness for the teachers and fellow classmates and to pray for all classmates to be able to achieve maximum results. I felt that the prayers worked quite well, too. So, I hope all of you to try the prayers.

(4) Let's stop power struggling and unnecessary competition

Until today human beings have always engaged in multiple power struggles at the same time without noticing it. Our wishes have almost always crashed and conflicted with other people's wishes and desires. And we had to keep fighting with those unseen enemies to realize our own dreams. We did not know that our wishes were summed up and produced our reality. So, even today we were constantly engaging in power struggles without realizing, constantly hurting and getting hurt each other, and pushing out the weakest people from this earth in the form of death. So, let's stop such painful power struggles right now.

And also, competition is quite often the least efficient way to achieve maximum results. Competitions among companies are the product of ill-wishes. When we cooperate on a global level, something marvelous would happen. Why don't we try it?

So, let's stop power struggles and useless competitions.

And instead, let's pray God to give us the best possible way which makes all lives happy and at the same time enables us to achieve the goal most efficiently!

(5) Let's organize global task forces

Just like global education systems mentioned above, let's organize global task forces to develop what we need in the sky town. The task forces must allow all the people who are interested in to take a look at and participate if they like the projects. If we utilize Internet and satellite broadcasting system I believe that the superb task forces open to all people in the world will become possible to organize.

THE MISSION OF THE E-SOCIETY

(1) Divine Missions for each life

According to God, in this universe if we keep wishing *to make the maximum contribution to the happiness of all lives in this universe*, the system of this universe thoroughly examines one's Inga-jyouhou (personal history data) taking into account what one wished most and find out the best ways to utilize those data most efficiently and to make the maximum contribution for the happiness of all lives. Those ways of contribution is called a Divine Mission for each life. Since no two lives have the same preference records, Divine Mission is distinctive to each life. And when we pursue our own Divine Mission, no one can surpass us in the same field, because Divine Mission is the custom-made best way to utilize each life's personal history data.

In this universe we are all born, because somebody wanted us to join this world. And in this world, "what we love" is the gifts from others to us in order to enrich this world in our favorite ways. If there exists no negative wishes in this world, self-expression is also the means given to each life in order to enrich this world in one's favorite ways. In this universe, we become most competitive in the field we love most. We become a character we love most. A person who loves Hibari Misora, a Japanese singer, most is destined to become a singer. A person who loves a politician most is destined to become a politician. We become what we love most and we are expected to contribute to the world in our own favorite way.

2) The Mission of the e-Society

To get rid of all sadness from our society, e-Society's cooperation and contribution are indispensable. I believe that people who become researchers, developers, and engineers are the kind of people who love exploring new horizons and who love inventing something new. I also believe that all of you are wishing and dreaming to make the greatest contribution to the human society through your research and development activities. And I think it is the greatest and the finest wishes and dreams. There are infinite opportunities to utilize your talents and experiences in the Creation of the World of Love Project. I hope that all of you can utilize your talents at the maximum level and achieve outstanding results in your own way.

Below is the list of my petitions. Would you please save us all from all sadness utilizing your magical power?

- ① Please develop and provide enough Namadachi Goods to all people in the world and to some other lives which need human help.
- ② Please develop global information systems which can find out what people in the world need and want, and produce those goods in the most advance style. That means, to develop the systems which force nobody to do boring and tiresome works. Most of the conventional production lines can be replaced by the totally automated unmanned factories.
- ③ Please develop global distribution system which can distribute all goods to the people who want them.
- ④ Please integrate Internet and satellite broadcasting system and improve them to the omnidirectional communications web which can allow all of us to join the global community directly by expressing ourselves and by receiving what we want. And please cover the entire world with that communication web.
- ⑤ Please develop space cars, space ships, space towns, etc.
- ⑥ Please develop Namadachi paper for books and for other use.
- ⑦ Please develop all the necessary infrastructures for the creation of the sadness-free society.

CONCLUSION

Several years ago, I went to one of the biggest book store in Tokyo. Then, God told me to buy a set of cassette tapes. They were an autobiography of the former British Prime Minister Margaret Thatcher recorded by her own voice.

I was very curious why God let me buy her autobiography. It was her father's story. According to Lady Thatcher, her father was politically very active man. During the World War I and II, he saw miseries and tragedies with his own eyes, and those traumatic, shocking experiences seemed to make him contemplate and seek out the ways to save human beings from tragedies for years until the day he died.

One day Lady Thatcher took her old chemistry book and in it she found a memo written by her dead father. It said something like this:

"Only Jesus Christ can help human beings!"

And then God said to me,

“Because there were innumerable predecessors who screamed, grieved, and anguished from countless tragedies and miseries, and longed for peace and happiness for years and years and years, and yet they themselves died in despair... Because there were innumerable predecessors who wished and wished and wished a peaceful world and prayed God for help like the father of Lady Thatcher,... Finally the time has come for Me to be able to teach YOU how can human beings be saved from all kinds of sufferings.

It is not only because of your parents' wishes and your wishes, or other currently suffering people's wishes in the world, but also it is because of a myriad of your predecessors' wishes for Me to help human beings. That is why you are now being able to learn how to solve all problems inflicting human society. It is like the screams of countless people lived on earth until today have finally reached to Me in the Heaven. You should thank all of those predecessors and other people who have ever wished for peace and happiness. You should also thank that all lives in heaven, because they are giving full-support for this undertaking, the Creation of the World of Love. They are looking forward to meeting with all lives on earth in the near future in a happy, exiting way.”

When God said this to me, I was still in a hell-like horrible situation. I could vividly imagine our predecessors' sadness and despairs and I was greatly moved by what God said.

For some people, the project I am proposing now may still sound unlikely or far-fetched. However, I believe that the people who are gathering here today really love this kind of projects. I believe that the people who are working in the advanced technologies and sciences would love to invent something new, love to explore new horizons, and love to create thrilling new future. And I believe, even for all the other people, creating something new and exciting is one of the finest pleasures in life.

What we have today was once what somebody wanted in the past. All great achievements made until today were originally somebody's bold but strong fascinating desires. When we recall the great achievements of Write brothers and other great predecessors, like Edison, Ford, Lincoln, Bill Gates, thousands of Nobel Laureates, and countless other brave men and women, I do not think that the Creation of the World of Love is too bold.

Today, we have almost all means to realize harmless lifestyle which enables us to live happily without hurting and killing any other lives. Space station already exists. We are already traveling in the air. Man can currently synthesize numerous things from sweeteners to protein. Why not making food from air or water? All we need is to wish and try. If we wish, we will be able to realize the target in the relatively near future. It will be really fun!

According to God, power we can use is the trust and the grant from other lives who have the same wish and interest. Many stars and athletes know that their power come from their supporting fans. And many lucky successful men and women know that their achievements became possible by their supporters, like family, friends, colleagues, mentors, etc..

When it comes to this supporting power, great people in the past have achieved many, many great things, in most cases, with the support of only a tiny portion of the population. On the other hand, our undertakings will be supported by ALL LIVES in this universe. I can not imagine what we can! It is beyond my imagination. So, I would like to see it actually.

Thanks to the countless predecessors and many kind people who supported me in various ways until today, I have finally reached to this honorable point to be able to propose the Creation of the World of Love to you, to all the people in the world, and to all the other lives in this universe.

Now, friends in this universe, let's start creating the World of Love, together! Let's make our finest dreams come true! And let's find out infinite forms of excitements and joyous secrets hidden in this wonderful, superb world, together with all lives in this universe as God wanted so!

Lastly, I would like to extend my heart-felt gratitude again to SSGRW Conference management team, the people who are gathering here today, friends in this universe, and my great Load, God.

Thank you very much!
